

February 6, 2022

Markets of interest

**Bitcoin.** The daily chart has formed a channel (log scale). This is a diagonal pattern – and thus offers tactical challenges for a long position. I will monitor BTC for a measured-risk trade.

Patterns: Possible ascending triangle on weekly chart; channel on daily chart. The market is presently trading into trendline resistance

**UPS.** Long 100%. I missed the initial breakout but went long on Friday's retest of the ATR breakout.

Pattern: 9-month continuation inverted H&S on weekly chart

**5-Yr T Notes:** Short 100% as of Friday's completion of a possible 3-week pennant.

Pattern: Strong trend, continuation pennant on daily graph

**Soybean Oil.** Long 100% in the Mar contract. Oil is a dog compared to Beans and Meal. I hate being long the laggard.

Pattern: Symmetrical triangle on weekly chart

**CORN (ETF).** Long 100%.

Pattern: Symmetrical triangle on weekly chart

**S&P futures.** Short 50% as of Thursday. This trade is pure shot in the dark. There is the possibility of a massive H&S top. Wednesday's doji head shot offered me the opportunity of a low risk short. It will be a miracle if I am not stopped out of this trade.

Pattern: Possible H&S top on daily and weekly graphs, Head Shot (doji) on Wednesday

**Dec 2022 Eurodollars.** Short 50% as of Friday. There was no pattern – this short is just attempt to get short in a strongly trending market. This trade is based on the belief that the interest rate markets have not accurately discounted surmounting inflationary pressures.

Pattern: None in Dec 22 contract. This is a case of just trying to hop aboard a moving train

**Gold.** Flat.

Patterns: Possible Cup and Handle on the monthly graph and symmetrical triangle on the daily chart

Copper. Flat.

Pattern: Symmetrical triangle on weekly chart

Russell. Flat. I am interested in shorting a retest of the completed top.

Pattern: Completed rectangle top on weekly graph

Apple. Flat. I would prefer a couple more down days to provide more clarity to the right shoulder of an inverted H&S.

Pattern: Interlocking Head and Shoulders on daily chart

**Canadian Dollars. Flat. A H&S top pattern on the daily graph could provide the launch for the completion of a major descending triangle on the weekly chart.**
