Lots of tools available to traders. Almost too many in fact. The key is finding the tools that work for you all. For me, I need to keep it as simple as possible. Thus, mainly its charts and charts only, but a few other things (ADX, BB, MAVgs, COT) for confirmation as needed

Just a note regarding this video

The USDA WASDE report is out on Friday at 8:30 Eastern. I will not be working grain orders until things settle down a couple of hours after the report. Then I will reassess.
