 The symmetrical triangle in \$AUDNZD has been recompleted

Factor Members, it is important to me to admit it when I have screwed up. Transparency with self and other traders is something we should all do.

I advanced my stop in Cotton for the Factor Prop account too quickly. The sell stop should have been below the Feb 20 low (3DTSR) or the Feb 12 low (last full bar below the 8 DMA).

Update on Nikkei

The 39,200 target has been met. I have split the Position Unit (my final 50%) into two tranches. Profits taken on one of the two (25%) and will use 8 DMA for other 25%. I am still holding the experimental long trade (NOT INCLUDED IN PROP PERFORMANCE DATA)
