An update on the non-prop account trades based on weekly charts and developing rules
Soybeans - remain short. Price in clear downtrend. Daily chart - 8 DMA remains below 18 DMA and price has remained below 18 DMA. Small falling wedge forming. I will look for tighter chart stop once 1175 is reached.

FactorMembers @factor_members · Feb 7

In Mar Nikkei, 8 DMA has remained above 18 DMA and price has remained above 18 DMA. Price is finding support at 8 DMA but possibility of a roll-over (price has full bar below 8 DMA and 8 DMA rolls over through 18 DMA. Stops moved to below bank of recent lows. I'm looking to add...

...

Day in review - Tuesday and Wednesday.

Soybean Oil broke down from a falling wedge with a bear trap. Wednesday confirmed the buy signal. I am flat.

A small continuation pennant was completed on Wednesday in NASDAQ

I did not consider this buy signal on Jan 18 at the time as a completed H&S failure because it was Cotton (which I do not always take seriously), but I know some members identified this in real time. [\\$CT_F](#)
