

## Factor Members Private Twitter Feed - February 27, 2024

FactorMembers ❖ ♠ @factor\_members · Feb 27 Chart of interest

Interesting stock chart \$NUE

FactorMembers 🐶 🗈 @factor\_members · Feb 27

Big day up for Cotton. Congrats to all you Factor Members who one upped me by staying fully long. This might become your year's biggest trade \$CT\_F

## 

factor\_members · Feb 27

Chart of interest. This is what a classic Horn looks like. But do NOT trust me on Russell. I will be elected into the "Wrong on Russell" Hall of Fame

## Anthony @ACP\_CMT · Feb 27

• •

Peter thoughts on my recent ZW Wheat trade? Noticed the rectangle on the weekly then zoomed into the daily and found a descending triangle breaking around the lower range of the rectangle, entered after a confirmed retest, entry and stop loss identified. Stopped out for 100% risk

•

FactorMembers ♥ 🙃 @factor\_members · Feb 27

Lots of complicated differences between continuation chart and individual contracts so I have not even considered Wheat as a trade

**Defined Risk** @the1Gert · Feb 27

When rolling a contract, how do decide where to place the stop on the new contract?

Chasing breakouts completely destroys the reward to risk ratio.

**EricWerner** @EricWerner · Feb 27

Replying to @factor\_members

When you are monitoring a classical pattern and the breakout almost immediately reaches the target price (before you have a chance to buy) is it too late? If you buy after it surges higher wouldn't the stop have to be so low increasing the potential loss?

Day in review.

BIG AND BORING in terms of trades. Just a day to hold. I did exit ZFH24. Of course, big day up in BTC.

Even though I am only long a 50% position in BTC I am splitting it into two tranches for more flexibility in stop protection

FactorMembers ❖ ⑥ @factor\_members · Feb 27

Best examples come when there is pennant type continuation or when bigger pattern gets launched by smaller pattern. I bought the pennant in Nikkei on Feb 8 with a tight stop. Position size was almost double original long with same BP risk

**TechB** @Sangr32 ⋅ Feb 27

Replying to @factor\_members and @Ramblin\_Rebel13

Fine tuning entry means the ability to reduce the points risked without impacting the trade, does it?

If you could provide an example, it would be very helpful for understanding. ...
