Comment on Bitcoin \$BTC

My preference would have been for a slightly longer and a bit deeper right shoulder, but a close above 69,000 would technically count as a H&S failure

Consider this to be a guideline only. I will adjust these guidelines based on the power of a trend and the clarity/tightness of a pattern.

Day in review. Arguably, **\$BTC** completed a small HnS failure. Folks, this is just a trade for me - I give it maybe a 50/50 chance of working. I want NOOOO emotional buy in for myself. If it works, great, if not, so be it. Notice the initial stop and how target is generated.
