Brent Crude is set up for a massive bull move

The monthly chart displays a massive inverted H&S pattern with a target of \$242 on the continuation chart. Of course, timing will be of critical consideration given the likely volatility of such a breakout.

The daily continuation chart presents a 7-month inverted continuation H&S. Price is currently poised for a breakout.

Take this trade according to your own rules. A U.S. ETF/investment partnership is \$BNO.

End.
